

Join us for a

## COVER CROP COFFEE BREAK

*Thinking about trying some different cover crops  
after wheat this year?*

Here is an opportunity to see cover crop plots in the spring. Have a look at soil cover, soil structure and the impact of cover crops on water infiltration. Help us to count earthworms.

Spring considerations for cover crops: What survived? How to control?  
Planting into cover crop residues?

Date	Field Location	Features
<b>Tues April 15, 2014 10 am</b>	Henry Denotter NE corner of the McCain Side Road and Road 6W (north of Kingsville)	St Clair Region Cover crop project with mixes of oats, radish, clover and a 6 way mix
